Professional Experience

Senior Robotics Engineer 2022 – Present
Intrinsic Seattle, WA (Remote)

- "Intrinsic is building an intelligent robotics platform"

Senior Robotics Engineer 2021 – 2022
Vicarious (Vicarious was acquired by Intrinsic in May, 2022) Seattle, WA (Remote)

- Led the effort to adopt service-oriented architecture on deployed robot applications and then collaborated to deliver human-machine interface integration, containerization, and application management command-line tools.
- Collaborated with grasping and control team (separately) to design, plan, and adopt service-oriented architecture on deployed components to improve application initialization/execution speed, robustness, and isolation.

Robotics Applications Engineer 2017 – 2018
Savioke San Jose, CA

- Contributed to maintaining and developing existing and new on-board and desktop applications backends (e.g., single and multi-robot behavior management system) and support infrastructure (e.g., configuration and notification management systems) that were deployed to 50+ mobile robots.

Research Intern 2016 – 2017
Savioke San Jose, CA

- Deployed a non-roboticist-friendly bevahior programming system and used it for collaborating with partner companies including an airport management company in Southeast Asia.
- Explored new mobile robot applications using techniques adopted from product design research, which resulted in beta applications and academic publications.

Research Assistant 2018 – 2020 & 2011 – 2015
University of Washington Seattle, WA

- Designed, built, and 3+ evaluated robot programming systems for non-roboticist developers with inspirations drawn from programming languages research and web development communities' work.
- Built and deployed end-to-end mobile robot and robot manipulator applications involving perception, planning and control, and UI components; evaluated the applications by conducting user studies.
- Communicated insights in 20+ publications and 10+ presentations at major robotics conferences.
- Recruited, trained, and mentored 14 undergraduate students and co-authored 5+ academic papers with 7 of them; two students started their own research projects which resulted in academic publications.

Education

Ph.D., Computer Science & Engineering July 2020
University of Washington Seattle, WA
Dissertation: *Human-Centered End-User Programming for Interactive Service Robots*
Reading committee: Maya Cakmak (Co-Chair), Rajesh P.N. Rao, (Co-Chair), Dieter Fox, Blake Hannaford
Advisors: Maya Cakmak and Rajesh P.N. Rao

Master of Science, Computer Science & Engineering November 2013
University of Washington Seattle, WA
Thesis: *Accelerating Imitation Learning through Crowdsourcing*
Advisors: Rajesh P.N. Rao and Maya Cakmak

Bachelor of Science, Computer Science June 2010
University of Washington Seattle, WA
Thesis: *Toward Hierarchical BCIs: Combined Motor Imagery and Evoked Potentials for a Humanoid Robot Control*
Advisor: Rajesh P.N. Rao

Publications

Mentoring

Undergraduate Research

- Hita Kambhamettu, 2021
- Mino Nakura, 2019-2020
- Anthony Lu, 2019-2020
- Elana Hummel, 2019-2020
- Eric Vincent, 2016
- Max Leigh Martens Glass, 2014-2015
- Aakash Sethi, 2014-2015
- Kevin Vu, 2014-2015

- Erin Yejin Yoon, 2014-2015
- Jerry Zhang, 2014-2015
- Maxwell Forbes, 2013
- Michael Sloan, 2012
- Jesse Dodge, 2012
- Matthew Bryan, 2010-2011
- Joshua Green, 2010-2011

Teaching

Undergraduate Robotics Capstone
Teaching Assistant, September 2013 – December 2013
Teaching Assistant, September 2011 – December 2011

Professional Master's Program - Robotics
Guest Instructor, May 2018

Departmental & Academic Services

Outreach
- Research in Computing Presentation, 2019
- Engineering Discovery Days (previously called "Computing Open House"), 2013, 2014, 2018
- Gyeonggibuk Science High School Students Savioke Visit Day, 2016
- DawgBytes-High School Girl's Summer Camp Session 2, 2014
- SSF: The Breath of Computing, 2013

Entrepreneurship Club
Co-organizer, 2018 – 2019

Reviewer
- CHI: 2017
- HRI: 2014, 2020
- ICRA: 2012, 2015, 2016
- ICSR: 2016
- IROS: 2014, 2015, 2016, 2018
